

We exalt to the Arab nation the failure of the ground attack launched by the occupation forces on the Gaza Strip on three fronts. There were significant losses in enemy ranks, both in soldiers and equipment.

The enemy fell into ambushes set up by the Palestinian resistance on several fronts. Since the beginning of the battle, there were defensive plans against any attempt [to invade].

Kornet missiles and Yassin shells were used to repel the attack, and we expect the enemy to try again.

The "israeli" occupation used helicopters to evacuate their wounded and the dead from the battlefield.
