

Horrific testimonies about the crimes committed by the occupation and prison administration against prisoners and detainees in its jails.

The information and data we receive from inside zionist prisons about the systematic crimes committed by the occupation's prison administration against prisoners, since October 7th, are terrifying. There is a systematic decision to assassinate the prisoners through punitive measures carried out by the prison service, and evidence of this is the martyrdom of several prisoners.

The magnitude of crimes, both collective and individual assaults on prisoners—which occur during the raids on sections and cells and which are continuously escalating—is alarming, in addition to the adoption of a starvation policy against them, as the prisoners only have tuna, corn, and sometimes inedible eggs as food.

The aggression against the prisoners began on October 7th. The prisoners face ongoing aggression, with continuous punitive operations and retaliatory measures affecting them and their families.

The Office of Martyrs, Prisoners, and the Wounded for the PFLP is closely following the issues of prisoners and detainees, which is challenging. We consider the silence of human rights, humanitarian, and international institutions unjustifiable. They must fulfill their humanitarian duty and what their conscience dictates, obliging the occupation to respect international laws and conventions established for this purpose. We hold them fully responsible for their lives.

The Office highlights the measures that the prison administration continues to impose on prisoners. The prison administration cuts off electricity to the prisoners' cells and rooms, deliberately cuts off their water supply, enforces a starvation policy, has withdrawn food supplies from prisoner sections, reduced meals to two times a day, closed the canteen, and deprived prisoners of other basic necessities.

Furthermore, heavily armed suppression forces raid all prisoners' sections and rooms, maltreat them, physically assault them, and use police dogs. They have escalated policies of depriving prisoners of medical treatment, forbidding visits from families and lawyers,

and denying them treatment in hospitals, especially for sick prisoners. The prison administration also reduced the space available to a prisoner inside a cell, where the number of prisoners in one cell reached more than ten, and many prisoners were transferred to solitary cells. Solitary confinement was imposed on prisoners and some sections were isolated from others.

We note that the prison administration has removed available television sets and electrical appliances, destroyed all of the prisoners' belongings, confiscated their clothes, leaving only one change of clothing for each prisoner. They have also confiscated radios, blankets, and shoes from them, prevented them from bathing and going to the courtyard, closed the sinks used for washing, and carried out collective transfer operations, including moving prisoners from one section to another and from one prison to another.

We, in the Office of Martyrs, Prisoners, and the Wounded of the Popular Front for the Liberation of Palestine, want to reassure our people that the General Secretary of the Popular Front, the comrade, leader, and prisoner Ahmed Saadat, and his comrades are well. They are at the heart of the battle with the prison administration, and they will achieve a great victory over the jailer and will soon gain their freedom. We are closely following all the developments inside the prisons, as well as the ongoing communications and negotiations for a prisoner exchange process being carried out by the Palestinian resistance to empty the prisons and release all the prisoners.

Freedom to our heroic prisoners.

Glory and eternity to the martyrs.

Speedy recovery to the wounded.

Victory is the ally of our people, and the occupation will inevitably come to an end.

Office of Martyrs, Prisoners, and the Wounded of the Popular Front for the Liberation of Palestine
