

In the name of Allah, the Most Gracious, the Most Merciful

The occupation's massacre of the displaced on Salah Al-Din road and in Al-Buraq school is a stain on the forehead of humanity. Our people will not be broken in the face of this criminal fascism.

The killing by the occupation of more than 50 martyrs in this massacre and its continued perpetration of more crimes in full view and hearing of the world, constitutes a stain on the forehead of the international community and all of humanity. Anyone who thinks that these massacres, which are carried out with the absolute support of the American administration, trampling all laws and human rules, will break our people and their resistance, is delusional. They do not understand the nature of this mighty people and their valiant resistance, rooted in this land and clinging to their rights until liberation and return, God willing.

In the name of Allah, the Most Gracious, the Most Merciful

The escalation of the occupation's heinous crimes against prisoners and detainees is Zionist terrorism that will not break the steadfastness of our people, and the promise of their liberation is coming.

Amidst the genocide and massacres committed by the Nazi occupation government against our people in the Gaza Strip, the occupation escalates its crimes of arbitrary arrest of more than two thousand Palestinian citizens in the occupied West Bank and practices all forms of horrific torture and degrading treatment against them. Additionally, under the directive of the terrorist "Ben Gvir," the enemy's prison administration intensifies its violations against male and female prisoners, in a desperate retaliatory attempt that reveals the extent of the fascist occupation leadership's fear of our people's struggle and the steadfastness of its prisoners.

We emphasize the urgent need for all human rights and humanitarian institutions worldwide to expose these crimes and massacres against detainees and prisoners in the occupation's prisons, and the genocide committed by the Nazi occupation army against

our people in the Gaza Strip, and to bring its perpetrators to trial before international courts.
