

## **No oil or fuel until the cessation of zionist terrorism and the genocidal war on Gaza**

In the face of the terrorist, fascist zionist aggression, the genocidal war, and the brutal massacres being carried out by the occupation targeting human life with the most horrific and atrocious crimes against humanity, including the killing of children, women, the elderly, and unarmed civilians, bombing of hospitals, medical and relief crews, civil services, and cutting off supplies of medicine, food, water, electricity, and communications,

We in the Palestinian factions call upon the professional syndicates, labor unions, and the popular sectors in the Arab and Islamic countries, as well as the free countries of the world, especially the land, sea, and air fuel and oil transport sectors, to declare a comprehensive strike and to stop and cut off the supplies of oil, fuel, and others to the zionist entity, the United States of America, and the Western countries supporting the zionist occupation, under the slogan "No oil or fuel until the cessation of zionist terrorism and the genocidal war on Gaza."
