

The world is complicit in targeting and destroying hospitals... and talk of a ceasefire is a cover for the ongoing crime.

The Popular Front for the Liberation of Palestine confirmed that the Zionist enemy has received international cover for the series of crimes it carried out today against the hospitals of the Gaza Strip, which constitute an extension of the crime of targeting hospitals since the beginning of the aggression.

The Front emphasized that the enemy, bankrupt [defeated] in confrontation with the heroes of the resistance, considers hospitals to be the direct target of its aerial bombing and ground campaign, not hiding this intention but rather persistently insisting on declaring its brutal intentions. Yet, it has still enjoyed and continues to enjoy full international cover for these unprecedented crimes in human history.

The Front stressed that targeting more than 8 hospitals within less than 12 hours, including 6 hospitals during the last few hours, is a clear confirmation from the occupation of the falsehood of what the American administration propagates about its intention to commit to a humanitarian ceasefire.

The Front warned of the danger of numbing the Arab peoples and solidarity forces with American claims about the occupation's commitment to a ceasefire, or the intention of the American administration to pressure it to refrain from targeting civilians, which is nothing but a big lie and a maneuver by the American administration to prolong the duration of the aggression and to provide full cover for the continuation and escalation of brutal genocide crimes.

The Front called on the Arab peoples, solidarity forces, and Arab governments to take a decisive and firm stance against the Zionist enemy and its supporting states, especially the United States of America.
