

The "israeli" occupation is using policies of genocide, starvation, home burning, and property destruction with the aim of displacing our Palestinian people outside the Gaza Strip.

The minister of Communications in the "israeli" occupation has once again announced the true intention of the occupation behind launching a genocide war against our Palestinian people in the Gaza Strip, which is the displacement of our Palestinian people and their expulsion from Palestine and outside the Gaza Strip.

The "israeli" minister stated that "israel" must use a well-thought-out plan by following policies of genocide, starvation, thirst, home burning, and pressure with all possible force, creating a hostile environment and imposing difficult conditions to achieve the goal of expelling Palestinians abroad.

With confidence and affirmation, we declare that all the world's plans and all the malicious schemes woven by the occupation with its agents and allies in the darkness of the night to displace our Palestinian people will not succeed. Our people prove every day that they are a great nation, clinging to their land, their sanctities, and their just cause. They make immense sacrifices, including martyrs, wounded, prisoners, blood, and great resources for the sake of their cause.

We call on all Arab and Islamic countries and all free countries in the world to condemn and denounce these statements, plans, and malicious intentions that have been repeated by ministers and officials in the "israeli" occupation.

We call on the international community and the United States of America to pressure the occupation to stop the comprehensive genocide war against our Palestinian people, to stop the torrent of blood, to stop the killing of civilians, children, and women, as **they are the ones who give it the green light and approve of the genocide war, and they participate in it.**
