

We condemn and denounce the American and British aggression that targeted sites of the Yemeni Arab Army at dawn this Friday. We consider it an aggression against all components of the [Arab and Islamic] nation and its peoples. We affirm that the Yemeni people, with steadfastness and determination, will triumph over all invaders, as they have proven throughout history.

The American and British aggression against the Yemeni people, and the continuation of massacres and genocides, as well as the collective genocide war against the Palestinian people, will further inflame the entire region. The biggest loser in this will be the Zionist entity and the oppressive Western countries, led by America, the head of evil and terrorism.

The American and British aggression on Yemen reveals that the oppressive Western countries utilize all their capabilities and power to protect the Zionist entity of terrorism and genocide.

Bahrain's participation in supporting the aggression on Yemen exposes the quagmire some Arab regimes have reached in serving the interests of the Zionist enemy, while they stand silent and spectating the slaughter and genocide of the Palestinian people by the new Nazis in the Zionist entity.

We extend our greetings and reverence to the Arab Yemeni people and their heroic army. We highly value and appreciate their authentic positions in supporting the Palestinian people and aiding them by preventing ships associated with the Zionist entity from sailing in the Red and Arabian Seas.
